Following activities are covered through our application

Librarian or Library assistant could add the new books in to library.

Library assistant can issue and collect the Books to the students.

Librarian, Library Assistant and Students are able to search the books

Librarian could see the repost of each book.

Role: Involved in Designing, coding, and test plan preparation, testing.

Technology: Visual Basic

2. Description: - Eventful

Eventful is a web service which aims to help users search for, track, and share information about events. Users can search for events worldwide by time, location, performer, and descriptive keyword. Users can create private or public calendars, including "smart" calendars which automatically update when events matching search criteria are added or existing events are modified. Eventful Demand allows users to declare an event or performance they would like to see locally, and then campaign for others to join their "demand". With enough declared interest, a targeted performer might then decide to plan an actual event. Various presidential campaigns utilized Eventful Demand. A major feature of Eventful is My Eventful, which enables users to view their watch list, which is a list of events they can optionally indicate they are "going to", as well as a list of events from the combined watch lists of all other users designated as "friends". My Eventful also provides users with a way to view and manage a list of favorite performers and venues, as well as a list of "saved searches". My Eventful also summarizes all Demands that a user has joined or started.

Role: Involved in Coding,

Technology: C Sharp, Visual Basic.

3. Website of College:

- **In** this website students as well as staff can check notification on the website.
- Students can also apply for new admission.
