Ref. No. BGSBU CoET / ECE / 16 / 1031

Date: 20<sup>th</sup> June 2016

NOTICE

The students of final year and pre final year ECE had an interaction with Prof. G.M. Rather, Professor NIT in one day workshop on "Technology Innovation and Intellectual Rights". Students were quite motivated and happy with the insight to Patents, Copyright trademarks etc. for safeguarding Intellectual property rights. Intellectual property rights are like any other property right. They allow creators, or owners, of patents, trademarks or copyrighted works to benefit from their own work or investment in a creation. The importance of intellectual property was first recognized in the Paris Convention for the Protection of Industrial Property (1883) and the Berne Convention for the Protection of Literary and Artistic Works (1886). Both treaties are administered by the World Intellectual Property Organization (WIPO)

Researchers presently are using these tools to safeguard their work from intellect theft. The aim of workshop was to spread awareness among the target audience about possible theft of their work and how to protect it by effective usage of Intellectual rights.
