### **Students and Parents Feedback (2020 – 2021)**

The university is using the Students' feedback as a base to make improvements in the existing system after reviewing and analyzing it carefully. The student's feedback questionnaire is attributing quantitative answers, focused on the quality of the in-course content, pedagogy, learning material, views about theory/practical courses and services extended to them by the university. The survey is opened to the students twice a year at the end of each semester to express their feedback/suggestions on the scheme, teaching-learning, and co-curricular activities. This feedback is then analyzed and appropriate suggestions are put forward to the academic council for implementation. Based on the feedback, valuable changes are recommended to the BOS to revise / shift the content of the course and submitted to the University for obtaining formal approval from the academic council of the university.

Most of the participants of the survey were satisfied with the program scheme. It has shown that continuous improvement in the scheme has shown positive feedback by the students. The content of the course and conduct of courses has gained the interest of most of the students. The syllabus, as per the feedback is as per the expectations of the Students. They are satisfied with allocated courses to them for teaching, activities conducted in the form of guest lectures and workshops, etc. during the Academic Year / Session 2020-21.

More over the feedback showed that most of the students were Satisfied with the resources available to them either in hardcopy form from Library or as e-contents from University Website and / or from Faculty directly. Most students have shown their satisfaction with their classroom experience with the faculties opting for different teaching styles including PPTs, live examples, etc., and incorporating interactive elements, problem-solving methodologies that have real-world relevance and provides appropriate challenges to support and enhance their learning process. Students through their feedback have agreed strongly that the Faculty encourages them for participation in the courses of study, thereby making it a Student Centric Approach. Moreover, the Department enriched the knowledge of the Students by organizing regular Lectures from Subject Experts from within as well as outside the University. As the Department adopts a student-centric as a prime motto, the department is always enthusiastic to follow methodologies and steps that may lead the students learning to the next level. For instance, Guest Lectures / Workshops, Site Visits, Project evaluations by external industry experts, and division of students' welfare are continuously working to serve the feasible demands of the students to ensure their holistic development.

The feedback clearly shows that the students have agreed that the content provided in the syllabus is well explained, sequenced, and appropriately linked with their professional growth. Moreover the contents are so aligned that it's delivery ensures quality learning to the students which further reduces the difficulty level of concepts and enhance their understanding on the subject.

Moreover the feedback from students clearly reflected that the students were satisfied with respect to the faculty engagement with them. The department introduces a concept of Mentor-Mentee methodology for providing personalized attention towards the overall personal and personality growth of the students. The allotted mentors contact the allocated mentees' and hold discussions on issues on monthly basis and suggest possible way outs to the students to deal with their present situation, at the same time parents are also kept in line with the situation to motivate and support their ward in all possible ways. Thus, the department also ensures to take feedback from the parents of the students, which is collected twice in an Academic Year, that is once in each Semester. Some of the parameters accommodated in the parent's feedback include quality of teaching, students' discipline, subject related facilities, cross-cutting issues, start-ups, etc.. Parents' feedback is analyzed and corrective and effective actions are thereafter planned accordingly.

The parents seems to be quite satisfied with the quality of course contents that are provided to their wards during their courses of study. Also it has been analyzed that the parents do agree on the point that courses being offered to their wards are quite relevant as per the existing technologies. Also, it has been analyzed that the parents are a little bit concerned on the professional adjustment / recruitment of their wards after their course is completed. The department has taken this concern of the parents quite seriously and has nominated Department Placement Coordinator who coordinates with the University Placement Cell for conducting and materializing Job interviews and interactions with Industry Experts. The Department Coordinator as well as other faculty have frequent interactions with the students so as to guide them in their career and future placements. The parents have shown their trust towards the Department in terms of the fact that it has a positive and balanced academic atmosphere that enabled their wards to be successful in their lives. The Mentor-mentee methodology adopted by the Department provides a more matured platform for Teacher-student interaction which forms the basis of a positive feedback from the parents.
