

Baba Ghulam Shah Badshah University Rajouri (J&K)

The Principal
College of Engineering & Technology
BGSB University
Rajouri

No. BGSBU/Acad/16/III-118
Dated: 13-2-2016

Sir,

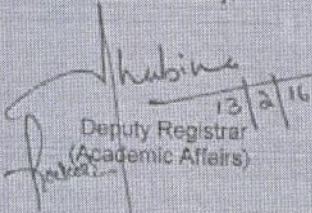

On the basis of the direction of Secretary, University Grants Commission, Hon'ble Vice Chancellor has been pleased to approve incorporation of a few topics on the "Ill effects of Fireworks and upkeep of clean environment" in Course Nos. CE-126, ERE-126, ECE-226, CSE-226, & ITE-226, Course Title: Engineering Chemistry & Environmental Science. The additions have been made in Unit-I of Syllabi of B. Tech CE & EREE and Unit-II of B. Tech ECE, CSE & ITE.

Copies of the modified versions attached herewith for your information and record. The modification made may be communicated to Boards of Studies in different streams and Academic Council as and when they meet.

Please furnish copies of the modified syllabi to the students and concerned class teachers for execution.

Thanking you.

Yours faithfully,

13/2/16
Deputy Registrar
(Academic Affairs)

Copy to:

- (i) Controller of Examinations
- (ii) Head, Department of Civil Engineering
- (iii) Head, Department of Computer Science Engineering
- (iv) Head, Department of Information Technology
- (v) Head, Department of Electronics & Communications Engineering
- (vi) Head, Department of Electrical & Renewable Energy Engineering
- (vii) Office file

Note

In view of the growing menace of Fire Works in all parts of the country the UGC desires to create awareness in the Society about the ill effects caused by their use to the environment. In this context the Secretary, U.G.C has addressed D.O No. 14-26/2015 (CPP-II) dated 15-12-2015 (Annexure. I) to the Hon'ble Vice Chancellor for

- Inclusion of "module on ill-effects of fireworks in the paper of Environment Studies which has to be compulsorily studied by all students as per UGC direction vide D.O No. F. 13-1/2000 (EA/ENV/CQS - I) dated 30th March 2015".
- "Organize forums, discussions and presentations related to hazards of fireworks and ways of reducing them"
- "Depute student groups and /or teachers to undertake educative workshop/lectures/presentations in schools and colleges in surrounding areas".

The letter was discussed with Ms Mamta Bhat, Assistant Professor, School of Biosciences & Biotechnology who holds Masters Degree in Environmental Sciences and has also qualified NET in Environmental Sciences. Apart from her teaching assignments in School of Biosciences & Biotechnology she has taught Environment Science to undergraduate classes in the College of Engineering for several years and is now teaching this subject in the Department of Arabic.

The concerned teacher has proposed inclusion of a few topics on Fireworks in the existing syllabi of Environmental Sciences in B -Tech and B.A Arabic (Hons) programmes. The existing and modified versions of the syllabi are placed across as Annexures. II & III.

Since the meeting of Boards of Studies in these academic programmes cannot be held now the Competent Authority may consider incorporation of these topics in the syllabi of the two programmes and authorise the addition under Statute 3 of university Act- section 8 (3).

If approved, the UGC will be informed as the U.G.C Secretary has desired.
